

KANWAR ABDUL REHMAN
Electrical & Instrumentation Engineer

Faisalabad, Pakistan — +92 337 991 7733 — ranakanwarkhan@gmail.com
linkedin.com/in/kanwar-abdul-rehman-b5330b253

PROFILE SUMMARY

Instrumentation & Control Engineer with hands-on experience in industrial process control, field instrumentation, PLC/DCS systems, and equipment maintenance. Strong in calibration, loop checking, troubleshooting, and coordination between field devices and control rooms. Familiar with safety interlocks, shutdown logic, IEC 61508 & 61850 and SIL practices. Committed to safe plant operation, documentation accuracy, and system reliability.

PROFESSIONAL EXPERIENCE

Ibrahim Fibres Limited, Faisalabad Dec 2025 – Present
Trainee Electrical & Instrumentation Engineer

- Hands-on involvement with HT & LT panels, feeders, MCCs, and field power distribution.
- Assisted in single line diagrams (SLDs) and electrical schematic drawings for plant power distribution using AutoCAD.
- Assisted in protection system testing of MICOM P122, P127, and P632 relays at 16 MW grid 132kV and 11kV panels, including secondary injection testing, trip circuit verification, and protection coordination validation to ensure grid stability and fault isolation reliability.
- Configured and commissioned Janitza UMG 96 energy analyzers for real-time electrical parameter monitoring, demand analysis, and power quality assessment for centralized energy management.
- Coordinated with production and maintenance teams during startup, fault diagnosis, and line optimization.
- Followed industrial electrical safety practices and maintained maintenance logs.

Sitara Chemical Industries Ltd., Faisalabad Feb 2025 - Dec 2025
Trainee I & C Engineer — Coal-Fired Power Plant Sep 2025 – Dec 2025

- Commissioning and tuning of control loops integrated with DCS for stable plant operation.
- Loop checking, signal mapping, and logic verification during startup and shutdown.
- Configuration and validation of control valves, MOVs, SOVs, and positioners.
- Interlock testing and coordination with operations during trip and startup sequences.
- Turbine control calibration including DEH, Woodward 505, and Bently Nevada 3500.
- ISO-compliant documentation: loop test sheets and calibration records.

Trainee I & C Engineer — Chlor-Alkali Plant Feb 2025 – Aug 2025

- Process automation support for electrolyzer and brine processing units.
- PLC/DCS configuration (Siemens, Mitsubishi, SUPCON, HollySys) and basic PID tuning.
- Signal commissioning between field instruments and SCADA/HMI.
- Commissioning support for 17kA Rectifier and 100A Polarizer.
- Preventive maintenance planning and fault diagnostics.

EDUCATION

Pakistan Institute of Engineering and Applied Sciences (PIEAS), Islamabad 2024
B.Sc. Electrical Engineering
Relevant Courses: Embedded Systems, Microprocessors, FPGA Design, Computational Intelligence

CERTIFICATIONS & SKILLS

- Google Project Management
- McKinsey Forward Program — Future Skills
- Leadership in 21st Century Organizations
- Get Started with Jira
- PLC/DCS Systems (Siemens, SUPCON, HollySys)
- Electrical Power Systems
- Tools: AutoCAD, TIA PORTAL, MS OFFICE
- Standards: IEC 61508, IEC 61850, SIL Practices
